Professional Experience

Freelance Full-Stack Developer | October 2024 - Present

- Built and deployed full-stack, server-rendered web applications for a diverse client base using React, Next.js, and TypeScript, focusing on performance, scalability, and clean, maintainable code.

- Designed and built back-end solutions in Supabase, creating database schemas, secure user authentication, and real-time features with PostgreSQL.

- Integrated RESTful APIs to ensure seamless data exchange between front-end and back-end services.

- Converted Figma mockups into pixel-perfect, responsive user interfaces with Tailwind CSS, delivering an intuitive user experience (UX) across all devices.

- Oversaw the full project lifecycle in an Agile environment, from client consultation to deployment, using CI/CD pipelines with Vercel and GitHub for automated and reliable releases.

- Used Git for version control to manage codebases and collaborate effectively on projects.

- Deployed and secured client applications on AWS and Cloudflare, optimising content delivery to achieve a 400% increase in organic traffic and improve SEO rankings for a key client.

- Set up and maintained efficient local development workflows with Node.js and Vite, increasing overall productivity.
